

Trees

Acer campestre – Hedge Maple – Z4

A moderate sized, rounded maple species maturing some 25-30' in height. The five lobed leaves are dark green throughout the growing season and transition to yellow in late autumn. Plants are tough as nails performing admirably in difficult urban settings where compaction, high salt levels and pollution are common. Additionally, they are tolerant of severe pruning and can be easily shaped into hedges or screens.

'Pulverulentum' - A fine form with foliage overlaid with a healthy dose of yellowish-white blotching and speckling. Plants are easy to grow and perform well in all but the soggiest of growing conditions. Could be used to make the coolest variegated hedge! – **2 gal \$45**

NEW *Acer carpinifolium* – Hornbeam Maple – Z5

A fine small maple forming a densely branched, spreading canopy in time. The simple, medium green leaves are quite un-maple-like more closely resembling a hornbeam or beech. Often a challenging plant to identify and certainly one worth trying to stump the neighborhood plant geek with. 20' - **2 gal \$35; 3 gal \$49**

Acer davidii – David Maple – Z6

A first class "snakebark" maple that was named in honor of the French missionary, Armand David, who observed the species while botanizing in western China. Plants develop an open framework of dazzling olive-green and white striped branches cloaked with handsome, lustrous dark green leaves. Best performance occurs in the shade garden in humus rich, well-drained soils. 30'

'Serpentine' - A graceful, small specimen tree reaching 15-20' tall when mature. The noteworthy green and white striated bark becomes steely purple during the winter months. Rich green, glossy foliage emerges purple in spring and adds appeal throughout the growing season. – **3 gal \$49; 5 gal \$69 (summer)**

Acer griseum – Paperbark Maple – Z5

An uncommon and truly spectacular maple that will mature into a wonderful small specimen tree. The unique, three-parted, dark green leaves are free of insect and disease problems and develop impressive red to orange fall color. In winter, the brilliant, exfoliating, reddish-brown bark stands alone in the landscape. Grows best in rich, well-drained sites in full sun or part shade. 25-30' – **2 gal \$35; 10 gal \$189; Assorted B+B plants individually priced**

Acer japonicum – Full Moon Maple – Z5

A handsome maple species closely related to its cousin, *Acer palmatum*. Plants mature into broad spreading, 20-30' trees. The lobed leaves are soft green and change to vivid shades of yellow, orange and red in autumn.

'Aconitifolium' – A striking, small-stature maple with large, finely textured, bright green leaves. In fall, the deeply lobed leaves transform to shades of crimson, orange, and yellow over a several week period. Surely one of the best small trees for fall color display. Matures 15-20' high and

wide. – **2 gal \$45; 5 gal \$89; 7 gal \$149 (summer); Assorted B+B plants individually priced**

'Green Cascade' – An attractive weeping cultivar with lacy, finely dissected apple-green leaves. Autumn colors range from bright yellows to russet and crimson. Plants develop a large, mounding habit and demonstrate excellent cold hardiness. - **5 gal \$99; 7 gal \$149 (summer)**

Acer negundo – Boxelder – Z2

A vigorous and rock hardy maple species that is tolerant of most full sun growing conditions. Habit is highly variable and often quite unkempt. Specimens can be allowed to reach their ultimate size (30-40') or can be cut back annually to maintain a smaller stature. Most agree that the straight species is unlikely to win a beauty contest. Thankfully, a few highly ornamental cultivars are available.

'Flamingo' – An exquisite selection offering brilliant pink and white-edged foliage. Makes an excellent display when cut back in late winter and maintained as a shrub. -

Assorted B+B plants individually priced

'Kelly's Gold' - Displays spectacular golden leaves that last late into the summer months. Waxy, silver-blue twigs provide added interest in winter. Truly one of the best gold foliage plants on the market. - **3 gal \$49; 7 gal \$99 (summer); - Assorted B+B plants individually priced**

Acer palmatum – Japanese Maple – Z5

An extremely variable maple species that has been cultivated for thousands of years. Hundreds of selections have been made throughout the world that showcase different ornamental features. All perform best in well-drained garden soil in either full sun or partial shade.

NEW **'Baby Lace'** – A curious new dwarf cultivar from Green Mansions Nursery. Plants offer delicate, finely dissected, reddish-orange foliage along a small arching framework. Plants are quite slow growing developing into a 3' x 3' arching form in time. Somewhat difficult to establish but well worth the extra effort. - **2 gal \$45 (summer); 12" sq. box \$169**

'Beni Schichihenge' – A wonderful variegated Japanese maple with green foliage that is irregularly marked with vibrant white, pink and rose markings. Every leaf is slightly different providing a striking multicolored accent. 15' – **2 gal \$45 (fall); 5 gal \$99; 6 gal \$149**

'Bloodgood' - An upright growing selection that matures 25' in height. It is widely regarded as one of the best and most cold hardy purple-leaf cultivars. The foliage color holds well through the season and turns brilliant red in autumn. – **2 gal \$39; 5 gal \$89; 7 gal \$129; Assorted B+B plants individually priced**

'Butterfly' – An excellent variegated Japanese maple with fine textured, blue-green leaves irregularly edged with a pinkish-white margin. Plants assume an upright, vase-shaped habit at maturity. 15' - **2 gal \$45; 5 gal \$99 (summer)**

'Crimson Queen' – A red, dissected-leaf selection that develops into an 8-10' arching plant in time. Excellent consistent red fall color. - **2 gal \$45; 3 gal \$69 (summer)**

'Ever Red' - A mounding, weeping form with elegant, finely dissected, dark burgundy-red foliage throughout the growing season. – **5 gal \$99; 7 gal \$149 (summer); Assorted B+B plants individually priced**

NEW 'Fairy Hair' – One of the most unique maples you'll come across. As the name suggests, 'Fairy Hair' sports extremely narrow, hair-like leaves that are so fine they resemble pine needles. Plants are quite slow-growing forming irregularly branched 2' tall specimens over a 10 year period. Choice, fascinating and hard to resist. - **12" sq. box \$169; 7 gal \$399**

NEW 'Goshiki Kotohime' – A tightly branched dwarf selection flaunting star-shaped leaves that are packed tightly along sculpted, upright branches. In spring the leaves emerge an intense amber-pink before aging to a cool medium green. Plants are slow growing forming 3-4' tall shrubby specimens over a 10 year period. - **3 gal \$69; 7 gal \$189**

'Harriet Waldman' - An exciting selection with rich, pink and white mottled new growth. Plants are vigorous, developing into upright 15' trees in time. - **2 gal \$45; 5 gal \$99; 7 gal \$149 (summer)**

'Higasa Yama' - A delightful Japanese maple that forms an upright framework of green leaves each illuminated with a prominent pink and white margin. Plants are vigorous growers and are the most impressive during spring and early summer. - **2 gal \$45; 5 gal \$99; 7 gal \$149 (summer)**

'Mikawa Yatsubusa' - An aesthetic treasure developing a unique, multi-branched, 6-7' sculpted form in time. The light green foliage is tightly packed along the stems in a neatly arranged, shingle-like pattern. Attractive, yellow-orange fall color and red samaras provide added appeal. A great plant for the rock garden. - **12" sq. box \$149; Assorted B+B plants individually priced**

NEW 'Orange Dream' – A knockout new selection that is certain to become quite popular. The shrubby, upright-oval plants showcase bright golden-orange spring growth that holds well throughout the growing season. Plants are average growers forming dense 7-8' specimens over a 10 year period. - **2 gal \$45 (summer); 20" sq. box \$299**

NEW 'Orangeola' – A most attractive and versatile weeping cultivar sporting lacy, burgundy-red foliage throughout the growing season. In autumn the leaves take on burnt-orange and fiery-red hues. Plants are among the most vigorous of the weeping Japanese maples and will mature 6' tall x 10' wide over a 20 year period. - **2 gal \$45 (summer); 10 gal \$229**

NEW 'Red Filagree Lace' – A brilliant selection with deep burgundy-purple leaves that are elegantly divided into fine-lacy segments. Plants are slow growing developing a broad, mounded habit 3' high and 5' wide in many years. An excellent choice for those looking for a smaller thread-leaf Japanese maple. - **2 gal \$45**

'Sango Kaku' - The classic "coral bark maple" with green stems that turn brilliant coral-red in winter. Plants are upright growers maturing 12-15' in height. Best reserved for zone 6 gardens. - **2 gal \$45; 5 gal \$99 (summer); 10 gal \$199**

'Shaina' – A recent selection that has begun to cause quite a stir. Discovered as a witch's broom on a plant of *A. palmatum* v. *atropurpureum*, this diminutive beauty has red-maroon foliage throughout the growing season. Bright crimson-scarlet fall color dominates the autumn landscape. Plants assume an irregular upright-oval outline and develop character with age. Makes an excellent container subject or

addition to the rock garden. 6' - **2 gal \$45; 3 gal \$69 (summer); 6 gal \$149**

NEW 'Sharp's Pygmy' – A dense, shrubby Japanese maple forming a rounded crown of twiggy branches cloaked with tightly packed fresh green leaves. In autumn the foliage takes on rich orange and scarlet tones that provide a reliable display at the terminus of each growing season. Plants are among the most diminutive of all maples and certainly an excellent option for adding a Japanese feel to the garden. 4' high and wide in 10 years. - **3 gal \$89; 5 gal \$139 (summer)**

'Shishigashira' – A choice, semi-dwarf selection with distinctive, curled and twisted small green leaves that add a unique ruffled texture to the landscape. In fall, the leaves transition to a handsome burnt-orange display that remains attractive for an extended period. - **2 gal \$45**

'Toyama Nishiki' – A fantastic, weeping, mounding maple with heavily dissected greenish-red foliage streaked and swirled with pink and white variegation. A striking accent plant best suited for a bright shady spot where the foliage can illuminate the surroundings. - **2 gal \$45; 10 gal \$229**

NEW 'Trompenburg' – A very fine, upright, vase-shaped tree sporting rich purple, palm-shaped leaves each with cleverly curled lobes. Plants are heat tolerant maintaining good color throughout the growing season before turning fiery crimson-red in autumn. 15-20' - **5 gal \$89**

'Ukigumo' - Commonly known as "The Floating Cloud Maple" this brilliant selection offers foliage mottled with a blend of pink and white. From a distance the leaves appear to blend together into a mounding, cloud-like form. Specimens are vigorous, upright growers and provide a graceful display unlike most variegated plants. - **2 gal \$45 (summer); 5 gal \$99; 7 gal \$149; Assorted B+B plants individually priced**

'Viridis' - A weeping selection with lacy, bright green foliage during the summer months and excellent orange-red fall color. Should find a happy home in most gardens. - **2 gal \$45 (summer); 5 gal \$99; 7 gal \$149 (summer); 20 gal \$289; Assorted B+B plants individually priced**

NEW 'Winter Flame' – A shrubby selection aptly named for its extraordinary coral-scarlet winter stem coloration. We first observed this selection last year and immediately knew it was something special. Foliage is light green during the growing season and picks up hints of yellow and orange tones in autumn. 6-8' - **6 gal \$139**

Acer pectinatum ssp. *forrestii* – Z4

A rare Asian species related to our native striped maple. Plants are vigorous and develop into small stature, upright trees. They exhibit white-striped branches that turn maroon-red in winter. Bright, butter-yellow fall color adds seasonal interest. Grows best in full sun or part shade in acid, well-drained soil. In our trials plants seem to be more tolerant of adverse conditions than other "striped" maples. 25' – **2 gal \$35 (summer); 3 gal \$49; 5 gal \$69 (summer); Assorted B+B plants individually priced**

'Alice' – A new form for us that appeared here a few seasons ago. Plants are vigorous growers developing an open habit with age. The deep green, 3-lobed leaves show a wide range of shrimp-pink coloration throughout the season. The display is quite variable and somewhat inconsistent as some leaves emerge pink while others pick up the coloration later in

the season. The best show appears to develop on vigorous shoots exposed to full sun. - **2 gal \$39; 5 gal \$69**

Acer pseudosieboldianum - Purple Bloom Maple - Z5
Another seldom encountered relative of *Acer palmatum* that develops into an airy, open branched 20' specimen. The medium green leaves and unique purple flowers are born along muscular, sculpted stems. In autumn the foliage changes to hot tones of yellow, orange and red. – **Assorted B+B plants individually priced**

Acer rubrum – Red Maple – Z3

A wonderful native species of the eastern and midwestern United States known best for its urban tolerance and spectacular scarlet red fall foliage display.

'Shocking Gold' – A fine selection of red maple with "shocking gold" foliage in spring and early summer. Fall color is a brilliant mixture of scarlet, orange and red. Plants are upright in youth and should mature similar to the straight species. – **2 gal \$39; 5 gal \$79 (summer)**

Acer rufinerve – Redvein Maple – Z5

A small deciduous tree native to the mountains of Japan. Medium green bark is marked with attractive grayish-white stripes when young and develops a diamond pattern at maturity. The three-lobed leaves have characteristic reddish tufts of hair on the veins when young and turn attractive shades of orange and yellow with reddish overtones in autumn. Overall an attractive small tree for shade to partial shade. **'Albolimbatum'**- An unusual form with leaves that are irregularly speckled and margined with white variegation. White and green striped stems and yellow-orange fall color complete the package. 30' – **2 gal \$39; 5 gal \$69**

Acer saccharum – Sugar Maple – Z3

A classic tree native to the eastern and midwestern US. Often thought of as one of the finest native maple species. Develops spectacular fall color in all shades of yellow, red and orange. Slow to medium growth rate with excellent hardiness. 40-60' – **Assorted B+B plants individually priced**

'Millane's Dwarf' – A very rare dwarf sugar maple maintaining all of the characteristics of the straight species in a smaller package. Plants are very compact achieving 3-4" of new growth annually. The original parent plant is over 50 years old and only 24' in height. An excellent patio or miniature garden specimen. - **2 gal \$39; 3 gal \$59**

Acer shirasawanum – Full Moon Maple – Z5

A rare maple species closely related to *Acer palmatum* and *A. japonicum*. Plants make eloquent specimens, slowly maturing into 20-30' trees. The large, palmately-lobed leaves are medium green during the growing season and change to varying degrees of yellow, orange and red in autumn.

'Aureum' - Known commonly as the "golden full moon maple" this brilliant specimen plant will develop into a 15-20' tree in many years. Glowing, golden foliage emerges in spring and holds through the majority of the season. In fall, leaves can turn fiery shades of yellow, orange and red. Plants perform best in any average garden soil in a partially shaded location. Somewhat difficult to propagate so get yours early as stock always sells out rapidly. - **2 gal \$45; 6 gal \$149; 24" sq. \$399**

'Autumn Moon' - Similar to the golden full moon maple except the foliage emerges rose-pink in spring and ages to chartreuse with pink overtones, creating a unique, two-toned look. At its best when sited in partial shade. - **2 gal \$45; 3 gal \$79; 5 gal \$99 (summer); 12" sq. box \$149**

Acer tegmentosum – Manchustriped Maple – Z4

A small, rounded tree native to regions of Manchuria, Korea and Russia. The overall appearance is quite similar to our native *A. pensylvanicum* with rich green stems prominently lined with ghostly white stripes and attractive butter yellow fall color. Plants develop into fine specimens and grow best in locations with even moisture and dappled shade. 20-30' - **Assorted B+B plants individually priced**

'Joe Witt' – A superb clone with bloomy, white-blushed twigs and large leaves that transform to shades of rich, golden-yellow in fall. Discovered by Joe Witt, curator of the Washington Park Arboretum. – **2 gal \$39 (summer); 3 gal \$49; 5 gal \$69 (summer)**

Acer triflorum – Three Flower Maple – Z4

An uncommon trifoliate maple closely related to *Acer griseum*, the paperbark maple. Plants exhibit tan-brown bark that exfoliates in vertical strips and scales. In autumn the dark green leaves turn spectacular shades of red and orange. Ultimate size will approach 30' in time. – **7 gal \$99; 10 gal \$139 (summer); 8-9' B+B \$329; 9-10' B+B \$389; 10-12' B+B \$429; 12-14' B+B \$489**

Acer x conspicuum 'Phoenix' – Phoenix Maple – Z5

A show stopping maple forming a medium sized shrub or small tree with glowing, white-striped, fire engine red winter twigs. Without a doubt one of the most breathtaking spectacles in the winter garden. - **2 gal \$45; 7 gal \$129**

Aesculus pavia – Red Horsechestnut – Z4

A shrubby, small stature horsechestnut native to the southeastern United States. Plants exhibit startling, red flowers born in upright panicles held above the handsome, disease free, glossy, green foliage. One of the best horsechestnuts for use in small residential settings. 10-20' – **Assorted B+B plants individually priced**

Aesculus turbinata – Japanese Horsechestnut – Z5

A vigorous species valued for its ornamental character as well as its timber. Plants flaunt oversized, palmately lobed foliage that adds a stunning tropical look to the garden. Creamy white flower panicles stand proud above the greenery in late spring. Plants are best suited for large properties where the 60' specimens can be most appreciated.

NEW **'Variegata'** – A very interesting and rare cultivar sporting large leaves that are variably speckled and splashed with cream-white variegation. Plants have a spreading branch structure and provide much tropical appeal. - **2 gal \$45; 3 gal \$69 (summer)**

NEW ***Albizia julibrissin 'Summer Chocolate'*** PP 13822 – Summer Chocolate Mimosa Tree – Z6 - Truly one of the premier new plant introductions of recent time. 'Summer Chocolate' boasts soft-textured, fern-like leaves that emerge greenish-bronze in spring. As the season progresses the color becomes darker, maturing deep burgundy-black by August. Puff-like, pinkish-red blossoms contrast vividly with the

foliage in late summer. Plants are very fast growing developing a broad, airy, vase-shaped silhouette in time. Like the species 'Summer Chocolate' is both drought tolerant and adaptable to varied soil conditions. Excellent for use as a specimen in a sun drenched exposure. – **3 gal \$69; 7 gal \$149 (fall)**

Alnus glutinosa – Common Alder – Z3

A medium-sized tree or large shrub indigenous to Europe, Asia and northern Africa assuming a pyramidal canopy when mature. Plants are vigorous growers and are extremely adaptable, tolerating a range of soil moistures, pH levels and light conditions. Foliage is dark, glossy green and free from pest and disease problems. An interesting choice for difficult sites where few other plants will survive.

'Imperialis' – An attractive, graceful selection showcasing unusual deeply dissected foliage. Plants are moderate growers and will develop into small pyramidal trees in time. Certainly unique and a great “fooled ya” plant to quiz your plant geek friends. 20-30' - **Assorted B+B plants individually priced**

Amelanchier laevis – Allegheny Serviceberry – Z4

An attractive, multi-stemmed shrub or small tree with an extensive native range extending from Newfoundland to Georgia. The fleecy, white flowers appear in early spring in 3-4” panicles. Soon after, the glossy foliage emerges flushed with bronze-copper overtones. Large crops of sweet black fruit appear in mid-summer and are prized by birds, animals and hungry nursery hands alike. Fall color can be gorgeous shades of orange-red. 20' - **Assorted B+B plants individually priced**

Asimina triloba – Common Pawpaw – Z5

An unusual large shrub or small tree native to the southeastern United States. Plants spread by underground stems and if allowed can develop into sizeable stands. As the foliage emerges in spring, plants display unique 1-2” purple flowers which develop into 3-5” kidney-shaped fruit. The fruit is edible and tastes like banana. Male and female plants are generally required for fruit production.

'Sunflower' – A self-fertile selection that requires only one plant to produce fruit. Plants always produce high yields and fruit are particularly large and sweet. – **2 gal \$45**

Betula nigra – River Birch – Z3

An excellent disease and insect resistant specimen tree that exhibits spectacular salmon-white exfoliating bark and yellow fall color. Plants are tolerant of both moist and dry soil conditions in any full sun location. Surely one of the most spectacular of the birches for all-around interest.

'Cully' Heritage® PP 4409 - A superior selection introduced by Earl Cully. Exhibits exceptional vigor, glossier leaves, and brilliant salmon-pink exfoliating bark. – **3 gal \$35; 7 gal \$99 (summer); Assorted B+B plants individually priced**

'Little King' – An underutilized, compact selection that matures 10-15' in height. Typical exfoliating bark of the species and attractive yellow fall color add seasonal interest. An excellent choice for smaller landscapes. – **5 gal \$69; 7 gal \$99 (summer); Assorted B+B plants individually priced**

'Shilo Splash' PPAF – An exciting variegated form of river birch discovered as a chance branch sport at Shiloh

Nursery in Harmony, North Carolina. Plants are much slower growing than the species and offer green centered leaves marked with a jaw dropping, ivory white margin. Optimum growth occurs in a bright shady spot with even moisture throughout the growing season. Choice and very rare! - **3 gal \$69; 7 gal \$129 (summer)**

'Summer Cascades' PPAF - An exciting, weeping cultivar that has begun to make its way through horticulture circles. Creates an attractive and unique disease resistant specimen plant. – **Assorted B+B plants individually priced**

Carpinus betulus – European Hornbeam – Z5

A prominent landscape tree that develops into a statuesque specimen in time. The species and its cultivars are a mainstay in European and American gardens where they are used for many landscape applications. They withstand heavy pruning and can be easily manicured into handsome screens and hedges. **'Columnaris Nana'** – An unjustly rare selection that's been floating around collections for years. In time, plants form incredible, dwarf, sculpted specimens that resemble fine bonsai creations.....just without all the pruning and primping. Plants are easily integrated into rock gardens or Japanese style plantings where they will slowly mature to 6' in height over many seasons. – **2 gal \$45 (summer)**

'Fastigiata' – The classic columnar hornbeam used widely in European gardens. Forms a distinct, upright habit in youth becoming more open with age. – **7 gal \$89; Assorted B+B plants individually priced**

'Pinnocheo' – A vigorous, fastigate selection maturing 20' tall and only 5' in diameter. Makes a wonderful formal addition to many landscapes. - **5 gal \$69; 7 gal \$89**

'Vienna Weeping' – A rare weeping form that will develop into a graceful, 20' specimen in time. A well grown plant is coveted for structure and form in the garden. Performs best in full sun with moist, well-drained soil. – **2 gal \$39 (summer); Assorted B+B plants individually priced**

Carpinus caroliniana – Ironwood, American Hornbeam – Z3

An underutilized small native tree or large shrub frequently encountered in woodlands and shaded stream banks in the region. The distinct, smooth, gray, fluted bark has a unique “muscléd” appearance and is attractive throughout the year. Fresh green leaves are free from disease and turn shades of yellow, orange and red in autumn. An excellent choice for naturalizing and in areas where its subtle beauty can be appreciated. 25' – **2 gal \$35 (summer); Assorted B+B plants individually priced**

Carpinus japonica – Japanese Hornbeam – Z5

An exquisite Asian species that develops into a shapely, broad-spreading tree reaching 25' tall at maturity. Foliage is rich, dark green and heavily ribbed with corduroy-like venation. In fall, yellowish, hop-like fruit dangle along the wiry, horizontal branches. Overall, an elegant, underutilized small tree. – **2 gal \$35; 5 gal \$69 (summer); 8-9' B+B \$199; 9-10' B+B \$229; 10-12' B+B \$269**

Catalpa bignonioides – Southern Catalpa – Z5

A vigorous deciduous tree native to the southeastern United States. Showcases sizeable 12” panicles of white and purple foxglove-like flowers in early summer. Broad, tropical looking foliage adds unique texture and appeal. Plants are

easy to grow performing happily in sunny exposures with all but wet soil conditions. 60'

'Aurea' – A brilliant, gold foliage form of the southern catalpa. The large, heart-shaped leaves retain their golden color well into the growing season. An excellent choice to contrast with burgundy or blue colors in the garden. At its best when cut back annually to maintain smaller stature. Makes a refreshing addition to the back of the shrub border or can be allowed to mature into a dazzling specimen tree. 30-40' - **3 gal \$49**

NEW **'Pulverulentum'** - A rare and most unique selection showcasing magnificent, bold textured leaves generously brushed with creamy-white mottling. Rarely if ever offered for sale in the United States. - **3 gal \$49**

***Celtis sinensis* 'Green Cascade'** – Weeping Hackberry – Z6
A graceful weeping tree introduced by Camellia Forest Nursery. The original was selected from a batch of seedlings collected from a famous weeping specimen growing at a shrine in Japan. Plants are quite vigorous and can easily be trained into unique pieces of living architecture. A great choice for training over a stonewall or onto a pergola. - **2 gal \$39 (summer); 7 gal \$139**

Cercidiphyllum japonicum – Katsura – Z4
A stately, fast growing, specimen tree that matures 40-60' in height. The unique, heart-shaped leaves often emerge pinkish-red in spring and turn shades of orange and yellow in fall. As the leaves change colors and fall from plants they emit a unique "cotton candy" fragrance. Plants prefer even moisture in sun or part shade. – **Assorted B+B plants individually priced**

'Heronswood Globe' – A compact selection that was discovered and introduced by Heronswood Nursery. Typical heart-shaped leaves emerge burgundy in spring and transform to shades of pink and yellow in fall. Plants are well suited for smaller gardens as they maintain a smaller habit, maturing 20' tall. – **3 gal \$45; 7 gal \$99; Assorted B+B plants individually priced**

'Rotfuchs' (Red Fox) – A recent introduction from Europe. New growth emerges dark bronze-maroon in spring. The coloration is retained for several weeks until it slowly fades to bluish-green by mid summer. – **3 gal \$45; 7 gal \$99; Assorted B+B plants individually priced**

'Tidal Wave' – An exceptionally vigorous, weeping selection introduced by Bill Barnes of Lorax Farms. The unique plants display a strong weeping habit and excellent blue-green leaf coloration throughout the growing season. – **3 gal \$45; 7 gal \$99; Assorted B+B plants individually priced**

'Titania' – An amazingly vigorous new form developing a narrow, columnar crown in time. Certainly expands the palette of katsura cultivars available and quite valuable for narrow spaces where a large plant is required. Would be an excellent choice for a wind break and could be used quite similarly to the disease prone lombardy poplar. - **Assorted B+B plants individually priced**

Cercis canadensis – Eastern Redbud – Z5
A wonderful, small-stature tree native to the eastern and midwestern United States. Plants develop rosy-pink, pea-like flowers along the branches in early spring before the leaves

fully emerge. Makes an excellent choice for partial shade in any moist but reasonably drained soil. 25' - **7 gal \$89;**

Assorted B+B plants individually priced

'Covey' PP 10328 – A graceful weeping selection from noted plantsman Tim Brotzman. Same charming flower display as the species. Plants need to be staked in order to gain height. – **7 gal \$99; Assorted B+B plants individually priced**

NEW **'Floating Clouds'** – A fine new variegated form offering foliage that is wildly splashed and streaked with white variegation. Interestingly, the initial flush of growth is green with the variegation becoming pronounced as the foliage matures. Plants are vigorous growers, sun tolerant and quite different than the classic selection 'Silver Cloud'. – **5 gal \$69 (summer)**

'Forest Pansy' – A beautiful selection with rich, purple-burgundy foliage and an abundance of dark pink flowers. The foliage coloration holds well in our region making a breathtaking display in the garden. A must for color and contrast! – **2 gal \$39; 5 gal \$69 (summer); 7 gal \$99; Assorted B+B plants individually priced**

'Hearts of Gold' PP 17740 – An exciting redbud with screaming golden-yellow foliage! Foliage remains bright gold during active growth and will not scorch in sun. A dramatic departure from the species and certain to become a winner. – **10 gal \$129; 15 gal \$169; Assorted B+B plants individually priced**

'Little Woody' PP 15854 – A cool new selection that is quite a bit different than your run of the mill redbud. Plants assume a compact habit of thick, chubby branches that dress themselves with tightly spaced, crinkled and curled leaves. The foliage has an excellent blue-green cast and remains attractive throughout the season. 8-10' – **5 gal \$69; 7 gal \$99**

'Silver Cloud' – A colorful selection with delicate, papery leaves that are splashed and mottled with pink and white variegation. Plants show restrained growth and perform best with even moisture and part shade. A choice garden gem when grown properly. – **5 gal \$69; 7 gal \$99; 10 gal \$139 (summer)**

Cercis chinensis – Chinese Redbud – Z6
A deciduous, upright multi-stemmed shrub reaching 10-12' tall at maturity. Dark purple, pea-shaped flowers appear up and down the stems in spring, prior to leaf emergence and 1-2 weeks ahead of our native *C. canadensis*. Glossy, heart-shaped leaves provide additional appeal throughout the growing season. Plants are easily transplanted and are adaptable to a variety of landscape uses. - **Assorted B+B plants individually priced**

'Don Egolf' – A highly regarded selection of Chinese redbud introduced by the National Arboretum. The compact plants are literally covered from head to toe with a dramatic display of rose-lilac flowers in spring. Sturdy dark green leaves and good disease resistance add value. - **2 gal \$39; 3 gal \$49; 5 gal \$69 (summer)**

Chionanthus retusus – Chinese Fringetree – Z6
A wonderful, large shrub or small tree. Develops beautiful, fleecy, snow-white flowers in May and June followed by abundant ½" long, blue-black fruits on female plants. The gray-brown peeling bark and lustrous dark green leaves add

additional ornamental appeal. 15-20' – **Assorted B+B plants individually priced**

'Arnold's Pride' – An amazing selection from the Arnold Arboretum that showcases an abundance of fragrant white flowers and blue fruit. Plants are vigorous growers forming a central leader and rounded crown in time. The original is still on the grounds of the Arnold Arboretum and is certainly one of the finest specimens of this species in the country! - **3 gal \$49**

'China Snow' - A fine Chinese fringetree selected by noted plantsman Don Shadow from a superior specimen at Old Sanford Arboretum, Knoxville, TN. Plants offer impeccable, dark green, polished foliage and are reported to showcase a spectacular floral display. - **3 gal \$49**

Chionanthus virginicus – White Fringetree – Z4
An exceptional large specimen shrub native to the eastern United States. Develops abundant 6-8" soft-textured, airy white flowers in May followed by abundant, blue-black, grape-sized fruit on female plants. Plants grow best in rich, acidic soil but are adaptable to other conditions. 10-20' – **3 gal \$35; 5 gal \$59 (summer); Assorted B+B plants individually priced**

'Emerald Knight' – A choice male selection introduced by Highland Creek Nursery in North Carolina. Plants have handsome, lustrous, dark green foliage and an abundance of fleecy white flowers that hang from the branches like a late spring snowfall. Plants have been tough to propagate so are rarely available. – **2 gal \$35; 5 gal \$59 (summer)**

Clerodendrum trichotomum var. fargesii – Glory Bower – Z6

A large, slowly suckering, deer resistant, shrub maturing 12-15' in height. Sweetly fragrant, white flowers smother the plant from July through the end of August. Flowers are followed by striking, metallic blue, pea-sized fruit each surrounded by a bright red, 5-lobed calyx. The display is exhaustingly beautiful at its peak. Plants are durable and are best used when blended into the shrub border. – **5 gal \$59; 7 gal \$89**

Clethra barbinervis – Japanese Clethra – Z5

A choice Japanese species of clethra that deserves much greater attention in the garden. Displays delightfully fragrant, white flowers in July and August followed by respectable red to yellow fall color. The bark is likely the most beautiful characteristic of the plant and reminds one of *Stewartia pseudocamellia*. Plants can be trained as trees or shrubs and perform best when given rich soil and ample moisture. 15-20' – **2 gal \$35; 5 gal \$69; Assorted B+B plants individually priced**

Cornus alternifolia – Pagoda Dogwood – Z3

A top notch native tree frequently overlooked for landscape consideration. Offers a wonderful horizontal branching pattern that works great to break up vertical elements in the landscape. Plants can have excellent flower and fall color impact. Grows best in moist, acid, well-drained soil in part shade. 12-18' – **2 gal \$35; 5 gal \$69 (summer); 7 gal \$89; Assorted B+B plants individually priced**

'Argentea' – A fine textured white and pink variegated selection. Plants are slower growing and more

refined than the species preferring a shaded location. Makes a breathtaking statement in our display gardens! 10-12' – **2 gal \$45 (summer); 6 gal \$129**

'Bachone' Gold Bullion™ – A noteworthy new selection of pagoda dogwood showcasing vibrant, yellow and chartreuse foliage throughout the growing season. Decorative, white, flat-topped flower clusters rest upon the tiered branches in early summer adding contrast and charm. Plants thrive in bright, woody locations in evenly moist soils. Discovered as a chance seedling by Kris Bachtell of the Morton Arboretum. - **2 gal \$39; 3 gal \$59 (summer)**

'W. Stackman' Golden Shadows™ PP 11287 – An exciting and choice selection that we've been growing for a few years now. Fortunately, plants are finally beginning to appear more prominently on the market. The medium green leaves are dramatically edged with an irregular bright golden-yellow margin. When combined with the horizontal branching pattern the effect is dazzling! Plants are exceptionally vigorous and appear to be quite easy to grow. Ultimate size is still unknown, however, we suspect they will reach 15-20'. – **2 gal \$39; 3 gal \$59; 5 gal \$89 (summer)**

Cornus controversa – Giant Pagoda Dogwood – Z5

The Asian counterpart to our native *C. alternifolia* that is similar in all aspects, just larger and somewhat tougher. Well grown plants develop into impressive landscape plants with their tiered branch pattern and showy, flat, creamy-white flowers. 35-40'

'Janine' – An exciting, new introduction that offers glowing, gold-edged foliage with bright green centers. Plants are very vigorous and quickly make outstanding specimens! Quite rare and sure to be popular among garden enthusiasts! – **2 gal \$39 (summer); Assorted B+B plants individually priced**

'Variegata' – One of the finest variegated plants available. Displays stunning, white-splashed and margined foliage on a prominent, horizontally branched tree. Plants are vigorous growers once established. People literally can't walk by our 15' specimen without staring in awe! Always in high demand and rarely available. – **2 gal \$45; 3 gal \$59 (summer); 12" sq. box \$149**

Cornus florida – Flowering Dogwood – Z5

One of the showiest small deciduous trees native to eastern North American woodlands. Develops a striking display of flowers in spring. Each flower head is surrounded by four showy, petal-like, white bracts which remain effective for several weeks. Flowers develop into clusters of marble-sized, bright red berries that are cherished by birds. Fall color can develop into radiant shades of scarlet and purple. 15-20'

'Appalachian Spring' – A University of Tennessee introduction selected for its superior resistance to dogwood anthracnose. In addition, plants showcase an abundance of moderate-sized white flowers. – **5 gal \$69**

'Cherokee Chief' – A popular, strong growing selection with rich, dark red flower bracts in spring. New growth is also flushed reddish-purple. – **Assorted B+B plants individually priced**

'Comco No. 1' Cherokee Brave® – A classic, dark pink to red flowered form of our native dogwood. Plants are excellent garden performers and highly resistant to powdery

mildew and dogwood anthracnose. - **5 gal \$79; Assorted B+B plants individually priced**

NEW 'Eternal' PP 13069 – A vigorous, fully double selection of flowering dogwood boasting ivory-white flowers each comprised of as many as 20 bracts. Plants are vigorous and show good resistance to powdery mildew. The best double native dogwood available to date! - **5 gal \$89**

NEW 'Karen's Appalachian Blush' PP 13165 – A fine, disease resistant cultivar originally discovered as a chance seedling in Decherd, TN. Plants assume the typical habit of the species with white floral bracts blushed with pale pink along the margin. - **Assorted B+B plants individually priced**

Cornus kousa – Kousa Dogwood – Z5

An elegant Asian relative to our native *C. florida*. Develops plentiful flowers in June and July, which are surrounded by showy white or pink floral bracts. The floral display on many selections can be effective for a month or more. Fantastic crops of showy red fruit dangle from the stems in autumn. Eye-catching fiery red, scarlet and crimson fall color. Truly among the finest of all specimen plants. We are pleased to offer an ever expanding selection of choice cultivars. 20-30'

NEW 'Akatsuki' – A brilliant sport of 'Satomi' recently introduced to the US nursery industry from Japan. Plants showcase green centered leaves boldly edged with creamy-white variegation. In June, pale pink to white flowers adorn the upright branch work. Plants are slower growing than the species reaching perhaps 12' tall and wide when mature. Best performance will occur in part shade with an even moisture regime. - **3 gal \$69**

'Angela' – A nearly unobtainable selection that comes to us via Weston Nurseries in Hopkinton, MA. Offers dramatic, stable, white-edged leaves and striking pink and burgundy fall color. Grows best in partial shade. – **2 gal \$39**

'Beni Fugi' – An attractive cultivar with generous deep reddish-pink flowers on a smaller stature tree. An excellent choice for smaller gardens and a personal favorite! 12-15' – **2 gal \$39; Assorted B+B plants individually priced**

'Blue Shadow' – One of the finest kousa selections introduced by the Polly Hill Arboretum. Plants offer impeccable blue cast leaves that provide the perfect foil for the masses of pure white, long-lived flowers that appear in early summer. A first-class dogwood reaching 30' tall. - **Assorted B+B plants individually priced**

'China Girl' - A vigorous form with large white bracts. Reported to flower from a young age. An excellent choice for those looking for a superior version of the straight species. – **3 gal \$49; 5 gal \$69**

'Elizabeth Lustgarten' – A graceful, pendulous selection offering snow-white flowers and brilliant, red-orange-yellow fall color. One of the most asked about plants in our display gardens. – **2 gal \$39; 3 gal \$59; 5 gal \$89 (summer); Assorted B+B plants individually priced**

'Gold Cup' – A recent selection with dark green foliage cleverly brushed with a prominent golden yellow central streak. Plants are quite similar to the classic cultivar 'Gold Star' but are reported to be more vigorous and maintain an upright stature. - **2 gal \$39**

'Greensleeves' – A vigorous grower offering exceptional dark green leaves and a heavy display of showy

white flower bracts. Found at the Biltmore Estate in North Carolina. - **2 gal \$35; 3 gal \$49 (summer)**

'Kristin Lipka's Variegated Weeper' PP 13384 – An exciting, variegated, weeping kousa dogwood introduced by plant guru Bob Lipka. Bob found the plant as a sport on a weeping kousa dogwood in his nursery and named it after his daughter. Plants are moderate growers developing a graceful, arching framework in time. Each light-green leaf is illuminated with a pronounced, creamy-white margin that turns shades of red and pink in autumn. – **3 gal \$59; 5 gal \$99; 7 gal \$139 (summer)**

'Limon Ripple' – A striking selection that originated as a branch sport on a seedling tree. Plants are moderate growers presenting narrow green leaves with prominent, glowing gold margins. One of our favorite gold variegated dogwoods. – **2 gal \$39**

'Milky Way' – A classic selection that sets the bar for white flowered cultivars of kousa dogwood. This top performer offers a dazzling display of white bracted flowers that remain effective for an extended period. 20-30' - **Assorted B+B plants individually priced**

NEW 'Ohkan' - A striking new kousa dogwood showcasing deep green leaves boldly margined with clean gold variegation. Plants stand out dramatically in the garden especially in June when the branches are cloaked with numerous white bracted flowers. A vigorous and adaptable grower, 'Ohkan' is sure to become a classic. - **2 gal \$45 (summer)**

'Satomi' – A vigorous, soft-pink bracted selection that has become very popular. Flower color is often variable from year to year and in different geographical areas. Genetic tests have shown it to be the same clone as 'Rosabella' and 'Heart Throb'. – **5 gal \$69; 7 gal \$109; Assorted B+B plants individually priced**

'Summer Fun' – An irresistible white variegated kousa that we like a lot. Each leaf emerges in spring with a stunning pinkish-white margin. Overall, plants have performed admirably in full sun and seem to be similar to 'Wolf Eyes'. – **2 gal \$39; 3 gal \$59**

'Summer Games' – A cultivar with leaves that are uniquely streaked, dappled and splashed with cream, pink and white variegation. Plants are moderate growers and distinctly different than the other forms we offer. – **2 gal \$39; 3 gal \$59 (summer); 5 gal \$89 (summer); 7 gal \$129**

NEW 'Summer Gold' – A fantastic new dogwood from noted plant enthusiast Crispin Silva. 'Summer Gold' treats us with brilliant gold-edged foliage that remains attractive all season. Plants are vigorous growers and resist leaf roll in full sun conditions. Certainly a promising plant and among the best of the gold variegated dogwood for general landscape use. - **2 gal \$45 (summer); 3 gal \$69 (summer)**

'Tri-splendor' PP 20008 – A vigorous, upright growing kousa dogwood showcasing spring growth that is butter-yellow with a prominent green margin. As the season progresses the color fades leaving cream-tipped foliage behind. Abundant, lime-green, white-edged blossoms appear in June followed by crops of cherry-like fruit in autumn. Plants require little pruning to maintain shape and show little leaf curl in full sun. - **5 gal \$89; 7 gal \$129 (summer)**

'Wolf Eyes' – A dramatic, white-edged form that is vigorous and less susceptible to burning than other variegated

selections. Phenomenal, bi-colored, pink and scarlet fall color is among the best of the kousa dogwood forms. Equally as interesting, are the unique, undulating leaf margins that develop on plants grown in full sun. – **2 gal \$39; 5 gal \$89; Assorted B+B plants individually priced**

Cornus mas – Corneliancherry Dogwood – Z4

An underutilized large shrub or small deciduous tree suitable for use in a variety of landscape situations. Plants awaken in early spring with an impressive display of small, yellow flowers on bare branches. Generous amounts of bright red, thumb-sized, edible fruit and a mosaic of gray, cream and brown bark provide added seasonal interest. 15-20' - **Assorted B+B plants individually priced**

'Aurea' – A vibrant, gold-foliaged form that creates a grand spectacle in spring and early summer when the color grabs all onlookers. Other ornamental features resemble the straight species. – **2 gal \$35; 3 gal \$49; 5 gal \$69 (summer)**

'Aureovariegata' – A variegated cornelian cherry dogwood that was sent to us under the name 'Aureovariegata'. Unfortunately, it is unclear if this is the true cultivar as several distinct clones have been circulated under this name.

Regardless, this particular clone offers yellow and gold mottled foliage that is best in spring but remains present in varied amounts throughout the growing season. - **2 gal \$35**

'Spring Glow' – A show stopping cultivar that is smothered with hundreds of bright yellow flowers in spring. Leathery, dark green leaves adorn the plant throughout the growing season. An excellent and underutilized introduction from the JC Raulston Arboretum. – **2 gal \$35 (summer)**

'Variegata' – A slow growing plant with spectacular creamy-white leaf margins. Best when grown in partial shade. Choice and rarely offered! - **3 gal \$49; 5 gal \$89 (summer)**

Cornus x rutgersensis – Hybrid Dogwood – Z5

A group of hybrid dogwoods resulting from crosses made between *Cornus florida* and *C. kousa*. Plants were initially developed by Dr. Elwin R. Orton and released by Rutgers University. All are vigorous growers, show exceptional disease resistance and are highly floriferous.

'Celestial Shadow' PPAF – A sport of *Cornus x rutgersensis* 'Celestial' discovered by Don Shadow. Plants showcase medium green leaves each boldly edged golden yellow. Foliage remains attractive throughout the growing season and picks up stunning pink and burgundy tones in autumn. One of the finest variegated dogwoods introduced to date! – **7 gal \$129**

'KN-30-8' Venus® PP 16309 – An amazingly vigorous selection with a dense branch structure that develops into a broad-rounded canopy in time. Plants flaunt an abundance of flower clusters in June which are set off by 4 massive white floral bracts. This display is complimented by lustrous dark green foliage that remains free from powdery mildew and anthracnose. - **7 gal \$129**

Corylus avellana – European Filbert – Z5

A large deciduous shrub that develops into a dense upright branched plant. Plants are grown commercially throughout Europe for their flavorful nuts. The straight species is rarely used as an ornamental.

'Contorta' – A curious filbert with wildly twisted and contorted stems. Creates an interesting architectural form

in the winter garden. Known commonly as Harry Lauder's Walking Stick. 8-10' – **2 gal \$45; 3 gal \$69 (summer); 5 gal \$89; Assorted B+B plants individually priced**

'Pendula' – A weeping form that was discovered at Bull's Nursery in France during the late 1800's. Specimens are somewhat common in European gardens but are still quite rare on this side of the pond. Plants are strongly pendulous forming an 8' tall by 15' wide awe-inspiring form. - **5 gal \$89; 7 gal \$139 (summer)**

'Red Majestic' PP 16048 – An exciting, new, contorted selection with rich burgundy leaves throughout spring and early summer. Resulted from a hybrid between *C. avellana* 'Contorta' and *C. maxima* 'Purpurea'. Makes a top rate, year round interest plant. Rare and Choice! – **3 gal \$89; 5 gal \$129; Assorted B+B plants individually priced**

NEW 'Rosita' – Hold onto your hats, here's an exquisite new hazelnut sure to impress. Plants are vigorous growers offering striking rich burgundy-bronze foliage that retains its coloration late into the season! Additionally, the delicate spring catkin display and fall fruit are similarly colored. Excellent for contrast in the garden and season long color. - **3 gal \$49**

Cotinus obovatus – Smoke Tree – Z5

An underutilized small specimen tree native to restricted regions in Tennessee, Alabama and Texas. Plants are perhaps best known for their intense fall foliage display which ranges from red-purple to yellow-orange. Airy, smoke-like flower panicles and exceptional, blue-green foliage during spring and summer provide added seasonal interest. Plants grow best in high light areas with decent soil drainage and show good adaptability to soils with high pH. - **2 gal \$35; 5 gal \$69 (summer); Assorted B+B plants individually priced**

Crataegus monogyna '**Compacta'** – Dwarf Hawthorn – Z4

A curious, dwarf shrub with thick, sturdy branching and an upright, sculpted growth form. Mature specimens are adorned by copious amounts of creamy-white flowers in spring and red berries in fall. Sure to add charm and character to any well-drained, sunny garden corner. 8-10' – **2 gal \$39; 3 gal \$59 (summer); 20 gal \$289**

Davidia involucreta* var. *vilmoriana – Dove Tree – Z5

The famed dove tree, which the great plant explorer E.H. Wilson referred to as "the most interesting and beautiful of all trees of the north temperate flora". Plants offer unique, bracted flowers in early spring that resemble white dove's hovering among the bright green foliage. In maturity, specimens develop a broad pyramidal habit and mature 25-30' in height. *D. i.* var. *vilmoriana* is more common than the species and differs in its greater cold hardiness. – **3 gal \$49; 5 gal \$99 (summer)**

NEW 'Crimson Spring' – A fine cultivar offering intense burgundy-purple spring growth. Typical habit, papery flowers and distinctive grace of the species. - **3 gal \$69**

Eucommia ulmoides – Hardy Rubber Tree – Z4

A delightful, uncommon shade tree sporting impeccable deep green glossy foliage on a rounded to broad-spreading canopy. The gray-brown bark is ridged and furrowed and much valued for its medicinal properties in its native China. Its namesake is derived from the 3% rubber content present in the bark.

Plants are moderate growers reaching perhaps 30' tall in 20 years. They are adaptable to a range of conditions including high pH soils and urban environments. - **2 gal \$39; 5 gal \$69 (summer)**

Fagus sylvatica – European Beech – Z5

Undoubtedly one of the most dramatic large specimen trees available to the garden enthusiast. Plants form a statuesque, rounded silhouette of glossy green, oval leaves that turn to shades of rich, golden-copper in fall. Makes a coveted specimen or versatile hedge in nearly any well-drained, sunny location. Many excellent cultivars have been selected and we are happy to be able to offer some of the best. 60'

'Dawyck Gold' – A tall, very columnar form with a bright golden spring flush that transitions to fresh lime-green as the season progresses. A brilliant structural form in a confined space or where a fastigate plant is required. - **2 gal \$39**

'Dawyck Purple' – A fastigate beech with deep purple-black foliage. Plants form a tall, narrow tree in time and show best coloration in full sun locations. - **2 gal \$39**

'Pendula' – A most unique, weeping specimen tree developing into an enormous, shapely mound of drooping branches and hanging branchlets that sweep towards the ground. Large plants are a magical sight to behold. Children and adults alike can't stop themselves from exploring the hidden playground beneath the canopy - **2 gal \$39**

'Purple Fountain' – A supreme specimen tree with elegant arching and cascading branches cloaked with dark purple-bronze foliage. Similar to other purple weeping forms but tends to maintain a narrower canopy and overall shape. - **2 gal \$39 (summer); Assorted B+B plants individually priced**

'Purpurea Pendula' – A strongly pendulous beech with dark purple-black foliage and a much smaller stature than other weeping varieties. Our 20 year old specimen has only reached 7' tall and 6' wide. A great specimen or accent plant and can be used much like a weeping Japanese maple in the landscape. - **2 gal \$39**

'Rohan Obelisk' - An upright, narrow form with handsome lobed, copper-purple leaves that take on green tones as they mature. A second summer flush of growth emerges bright, purple-red, contrasting brilliantly with the old growth. - **2 gal \$39; Assorted B+B plants individually priced**

'Rohanii' – A stunning form with rich, burgundy-purple leaves and a uniform oval canopy. Creates a stately, formal specimen tree in time. 50' – **2 gal \$39**

'Roseomarginata' ('Tricolor') – A classic form with purple leaves that are edged with an irregular pale pink margin. One of the best variegated plants available and on the short list of variegated, purple foliage plants. - **3 gal \$69; Assorted B+B plants individually priced**

Franklinia alatamaha – Franklinia or Franklin Tree – Z6

A storied small specimen tree or large shrub thought to be extinct in the wild. Originally, collected by John Bartram in the late 1700's along the banks of the Altamaha River in Georgia, the plant has not been seen in the wild since. Franklinias offer wonderful, 2-3", white, camellia-like flowers in late summer followed by brilliant, scarlet and orange fall color. Plants can be somewhat difficult to establish in the garden but are well worth the effort, besides they make great conversation pieces! 10-20'

'Wintonbury' – A selection made by Mark Sutcliffe from one of the largest plants growing in CT. Plants exhibit typical franklinia characteristics but also offer improved cold hardiness and disease resistance. - **2 gal \$45; 5 gal \$99 (summer); Assorted B+B plants individually priced**

Fraxinus pennsylvanica **'Variegata'** – Variegated Ash – Z3
A slow growing, handsome tree valued for its striking white-margined foliage. Large specimens rate high on the "wow meter" and cannot be ignored in the landscape. Like the species, plants are functional in a range of soil pHs in both wet and dry locations. Best growth occurs in part shade. - **3 gal \$69**

Ginkgo biloba - Ginkgo - Z4

A prehistoric tree that has been on earth for more than 150 million years. Plants are widely recognized for their unique history and medicinal properties as well as their ornamental appeal. Over time plants develop into massive specimens suitable for parks and large properties. The medium green, fan-shaped foliage is attractive all season and turns rich, butter yellow in fall. Plants are rock hardy and adaptable to all but exceedingly wet soils. 70'

'Chase Manhattan' – A tiny treasure with diminutive, dark green leaves and a compact growth form. An ideal candidate for bonsai or the rock garden. - **2 gal \$45 (summer)**

'Chris's Dwarf' – A new dwarf ginkgo with dainty, half-sized foliage. The upright plants gain 4" annually and are expected to reach 6' when mature. - **2 gal \$45**

NEW **'Gnome'** – Yet another rare treasure making its way through horticulture circles. 'Gnome' originated as a chance seedling spotted by the keen eyes of plantsman Ian Hiscock. These stubby dwarfs unfurl rich green leaves that pack themselves densely on the thick, muscular stems. A choice plant for the rock garden or other tight garden space. - **3 gal \$59 (summer); 5 gal \$99**

'Jehosaphat' – A dense shrub recently introduced by Rich Larsen of the Dawes Arboretum. Plants develop a tight, upright habit with amazingly thick stems and close internodes. The slow growing plants are among the most compact of the ginkgo cultivars currently available. Our 6-7 year old landscape plants are only 18" tall and 12" wide. - **2 gal \$45**

'Mariken' – A choice, dwarf form that was discovered as a witches' broom growing on a male plant of the species. Specimens develop a tight, dense habit with closely spaced leaves. Leaves are slightly smaller than the species and have curious undulating margins. Makes an excellent rock garden plant or conversation piece that is sure to impress visitors. Expected to reach 3' x 3' when mature. - **2 gal \$45**

'Robbie's Twist' – A bizarre form developing an irregular, upright habit with branches that arch and curve in every manner imaginable. The medium green foliage is typical of the species but the stems have an unusual coat of fuzz. Certainly a different selection and a plant our collector friends will lust after. - **2 gal \$45**

'Summer Rainbow' – An extremely rare ginkgo with prominent yellow striped and streaked leaves. Certainly a choice specimen plant and worthy of a place in any collector's garden. Get yours early as we anticipate demand will far exceed supply. - **2 gal \$45**

NEW ‘Troll’ – Among the smallest of the ginkgo selections, ‘Troll’ develops into a tight rounded form. The familiar fan shaped leaves are smaller than typical and densely packed along unusually thick stems. This fine selection is among the best dwarf ginkgos to emerge on the market. 3’ x 3’ - 2 gal \$45 (summer); 5 gal \$99 (fall)

‘Tubiformis’ – A compact, upright deciduous tree with a mixed bag of foliage types. Some leaves will appear normal while others are fused into intriguing tube-like forms. A fun and distinct addition to the ever expanding list of ginkgo cultivars. - 2 gal \$45

‘Weeping Wonder’ – A new selection only recently introduced to the US nursery trade. Early reports indicate that plants appear to have a narrow, upright habit with strongly pendulous branches. Foliage is deeply dissected and develops rich golden autumn hues. - 2 gal \$45; 3 gal \$69 (summer)

Halesia diptera var. *magniflora* – Two Winged Silverbell – Z5

A fine 20-30’ specimen tree native to the southeastern United States. In spring, branches are cloaked with numerous, bell-shaped white flowers which mature into unique two-winged seeds. Makes an excellent selection for both the shade and sun garden. – 2 gal \$39; 7 gal \$89; Assorted B+B plants individually priced

Halesia tetraptera – Carolina Silverbell – Z4

A fast growing specimen tree native to the southeastern United States where it grows as a small to medium-sized tree in understory settings. In the wild, plants are capable of reaching heights of 40-60’ however 20-30’ is more common under cultivation. Clusters of delicate, white, bell-shaped flowers dangle from the branches in spring creating a charming display, especially when viewed from beneath. Unusual, four-winged fruit develop in autumn and persist into cooler weather providing additional interest. Plants perform best in full sun or high canopy shade in moist, well-drained acidic soil.

‘Silver Splash’ – A rarely encountered variegated form of Carolina silverbell offering an irregular, creamy-white variegation pattern that brightens each leaf. Originated as a branch sport at the Tyler Arboretum, Media, PA. - 2 gal \$45; 5 gal \$99 (summer)

‘UConn Wedding Bells’ – A multi-stemmed selection made by UConn’s Dr. Mark Brand for its prolific and consistent floral display. Makes an excellent specimen plant and is a fine representative of this wonderful species! – 2 gal \$39; 5 gal \$79 (summer); 7 gal \$129

Halesia tetraptera var. *monticola* – Mountain Silverbell – Z5

A moderate-sized upright-spreading tree capable of reaching 40’ or more in height in the wild but is more commonly found in the 20-30’ range under cultivation. Plants display bountiful clusters of white, bell-shaped flowers in mid-spring. Plants are adaptable to many soil conditions but perform best in a rich, well-drained location in part shade.

‘Arnold Pink’ – A tree-like selection offering unique, pale pink flowers. Introduced by the Arnold Arboretum. – 2 gal \$39; 5 gal \$79 (summer)

‘Vestita’ – A form of mountain silverbell with larger flowers, slightly pubescent leaves and a tree-like growth habit. - 2 gal \$39 (summer)

Heptacodium miconioides – Seven Sons Flower – Z4

An underutilized deciduous shrub or small tree. Develops sweetly fragrant, white flowers in August and September followed by brilliant red calyxes in October. The overall effect is breathtaking and is much like having two completely different bloom periods. In winter, the tan-brown bark exfoliates in thin strips and plates to reveal startling whitish inner bark. A great specimen plant or addition to the shrub border. One of our favorites! 15-20’ – 2 gal \$35; 3 gal \$49; 5 gal \$79 (summer); 7-8’ B+B \$199; 8-9’ B+B \$239; 9-10’ B+B \$269; 10-12’ B+B \$299

Koelreuteria paniculata – Golden Rain Tree – Z5

A moderate sized specimen tree boasting deep-green, pinnately compound leaves along coarse textured branching. Abundant bright yellow flowers held in sizeable open clusters appear in July. Unique greenish-yellow, papery capsules develop in autumn extending the season of interest. The capsules often dry on the trees and persist deep into the winter months. Plants perform best in sunny locations in any reasonably well-drained soil. They are pH adaptable and tolerant of pollution and urban environments. 30’ - Assorted B+B plants individually priced

NEW ‘Coral Sun’ PP 17409 – A breakthrough selection that has finally arrived on US soil after countless years of effort. Plants burst forth in spring with showstopping hot orange-pink new growth sure to elicit admiration from anyone with a pulse. The color is amazingly unique in the world of plants and sure to add much interest in the spring garden. After several weeks of display the foliage returns to the medium green associated with the species. Plants are slower growing than the standard form developing into large shrubby specimens. - 2 gal \$45; 5 gal \$99 (summer)

Liquidambar styraciflua – Sweetgum – Z5

A large, deciduous tree valued for both its timber and ornamental qualities. In the landscape, plants develop into stately specimen trees when given enough room. Their unique, star-like leaves, which turn dramatic shades of crimson, yellow and purple in fall, have few rivals. Overall, a wonderful, easy going tree at home in all soil conditions. 60-75’

‘Frosty’ – An exciting, new selection that brings a whole new leaf pattern to the realm of sweetgums. Each large, palm-shaped leaf is marbled and speckled with an outrageous, frosted white variegation pattern. In fall, the foliage turns burgundy with a pink, orange and yellow mottled overlay. Sure to be a hit! – 7 gal \$99; 10 gal \$149 (summer)

NEW ‘Gold Beacon’ PPAF – A brilliant new selection showcasing eye-popping canary-yellow foliage that remains bright and intense throughout the growing season. In autumn, the cool weather brings dramatic orange and red hues. Plants are vigorous growers performing much like the straight species. - 3 gal \$49; 7 gal \$99 (fall)

‘Silver King’ – A dazzling cultivar offering stable, white-edged leaves. Surely one of the finest variegated plants available. – 7 gal \$89; 10 gal \$139 (fall); Assorted B+B plants individually priced

‘Slender Silhouette’ – The exclamation point of the sweetgums forming an absolute pillar of foliage some 60’ tall and only 6’ wide at maturity. Makes a perfect, fast growing subject for narrow situations where vertical accent is required.

Discovered by renowned plantsman and all around plant fanatic Don Shadow. - **3 gal \$49; 7 gal \$99 (summer)**

Magnolia acuminata – Cucumber Tree Magnolia – Z4
A fast growing, deciduous magnolia reaching enormous proportions at maturity. The oval leaves are 6-12” long and medium green in color. Numerous fragrant, 2-3” greenish-yellow flowers appear among the leaves in spring. Plants perform best in sun to part shade in fertile, evenly moist soil. 60-80’ - **Assorted B+B plants individually priced**

Magnolia ashei – Ashe Magnolia – Z6
Ashe magnolia is a fascinating small tree or large multi-stemmed shrub that is sure to impress all visitors to the garden. It is closely allied to the big leaf magnolia (*Magnolia macrophylla*) but tends to bloom at a dramatically younger age. In spring, the tropical looking 15-20” leaves provide a perfect backdrop for the massive 12-15” sweetly fragrant, creamy-white flowers. The overall effect is truly striking and looks like something straight out of Jurassic Park! Fist-sized, rose-pink fruit appear in fall providing additional ornamental appeal. Plants grow best in rich, well-drained soils in full sun or partial shade. Additionally, they benefit from some frost protection early in life. 30’ – **3 gal \$49; 7 gal \$89 (summer); Assorted B+B plants individually priced**

Magnolia grandiflora – Southern Magnolia – Z6
If you’re from the south this is the plant that comes to mind when someone says the word magnolia. The large evergreen specimens develop a handsome oval framework of impeccable, unblemished 5-10” lustrous, deep green leaves backed with brown pubescence. Massive, fragrant, pure white flowers create a grand spectacle in spring and sporadically throughout the remainder of the growing season. In our region plants perform best in rich, well-drained soil and benefit from protection from exposure and winter winds. 60’

‘**Bracken’s Brown Beauty**’ PP 5520 – A well known and hardy form showcasing deep green, wavy leaves backed with an abundance of fuzzy-wuzzy pubescence. Plants appear to be easier to grow than some other selections and are among the best forms for cultivation in our area. - **3 gal \$49; 7 gal \$89 (summer)**

Magnolia hypoleuca – White Bark Magnolia – Z5
A vigorous, upright tree with massive, 12-18” leaves arranged in whorls at branch ends creating a unique foliar affect. Sizeable, 8-10”, creamy-white flowers with purple-red stamens appear in May and June. Plants add an attractive, prehistoric-like feel to the garden. – **Assorted B+B plants individually priced**

Magnolia kobus – Kobus Magnolia – Z4
A choice specimen magnolia forming a 30-40’ rounded tree in time. Mildly fragrant, white flowers create a grand spectacle in mid April and assure us that winter has come and gone. Plants are true landscape pleasures performing above average in all reasonably well-drained soil types from limestone to silty-clay. ‘**Donna**’ – A heartwarming magnolia with unrivaled 8”, white flowers that are among the largest of any *Magnolia kobus* selection. Flowers are born in abundance on shrubby plants and are fragrant to boot! – **2 gal \$35; 3 gal \$49**

Magnolia sieboldii – Oyama Magnolia – Z5

A superb deciduous magnolia that develops into an elegant, large shrub or small tree. In May and June numerous white, egg-shaped buds expand to display exquisite, 3-4”, nodding flowers with striking, pink to maroon-red centers. Truly one of the finest magnolias available. 15-18’ – **2 gal \$35; 5 gal \$79; Assorted B+B plants individually priced**

‘**Colossus**’ – A recent selection offering large, 4”, semi-double flowers backed by attractive, medium-green leaves. Plants are vigorous and are reported to be more heat and sun tolerant than the species. Although originally thought to be a hexaploid further research with a flow cytometer found them to be diploid. – **7 gal \$129**

Magnolia stellata - Star Magnolia – Z4
A common magnolia developing into a large, rounded, shrub-like specimen in time. In April, the bare, gray branches are cloaked with masses of 3-4” white flowers with numerous tepals. Plants are among the hardiest of magnolias and are adaptable to a range of growing conditions.

‘**Centennial**’ – An excellent selection introduced by the Arnold Arboretum that commemorates their 100th anniversary. Plants are vigorous growers with large, 5-6”, fragrant flowers composed of 28-32 individual tepals. Our 25’ specimen always draws attention in spring. - **5 gal \$79; Assorted B+B plants individually priced**

NEW ***Magnolia tripetala*** – Umbrella Magnolia – Z4
A large deciduous species native to moist woodlands from southern Pennsylvania to Georgia. Plants are not for the timid as they boast massive 18-24” leaves that cluster in whorls creating an umbrella-like effect. Leaves are set off by equally impressive, 8”, creamy-white flowers which grace the plants during spring. Rosy-red, lantern-like fruit hang from the smooth gray branches during the autumn months. Plants assume an open, lax habit and perform best in rich, woody soils in partial shade. 30’ - **3 gal \$49; 7 gal \$89 (summer)**

Magnolia virginiana – Sweetbay Magnolia – Z5
A small, graceful, multi-stemmed shrub or small tree native to the eastern United States. Displays beautiful, white, lemon-scented flowers in June and sporadically throughout the summer. Flowers are set-off by 6”, glossy, dark green, silver-backed leaves. Develops into a worthy specimen plant. 25-30’

var. ***australis*** ‘**Perry Paige**’ Sweet Thing™ – A cute new dwarf sweetbay magnolia forming a shapely mound of lush, semi-evergreen foliage. After 14 years the original plant attained a bushy, rounded stature of only 8’ tall x 6’ wide. Early reports indicate superior evergreen tendencies with no foliar damage and good leaf retention when temperatures dipped below 0° F. An excellent variant of this wonderful native and well suited for use in the border or for screening and hedging. - **3 gal \$49; 5 gal \$79 (summer)**

‘**Wilson**’ Moonglow® - An upright cultivar with exceptional cold hardiness and superior vigor. Plants will mature up to 35’ in height and remain semi-evergreen in sheltered locations. Selected by Earl Cully. – **2 gal \$39; 5 gal \$79 (summer); Assorted B+B plants individually priced**

Magnolia zenii - Zen Magnolia - Z5
This rare deciduous species from China was introduced to the United States in the early 1980’s by the Sino-American Expedition. It is one of the earliest magnolias to flower in

spring with its welcome display of white-blushed pink flowers. Plants have good vigor and bloom from a young age.

'Pink Parchment' - A new selection introduced by Dr. Michael Dirr offering 4-5", frost tolerant, pale pink-white flowers in early spring. Fragrant flowers are born in abundance on vigorous, symmetrical plants. Last year it was the first magnolia to flower for us. - **3 gal \$49; 7 gal \$99;**

Assorted B+B plants individually priced

Magnolia Hybrids-

Magnolia x 'Anticipation' - Anticipation Magnolia - Z5 - A *Magnolia cylindrica* hybrid that blossoms early in the season for us with masses of large, ivory-white flowers that appear almost luminous if the sunlight hits them just so. The flowers are held upright on sturdy branches and have good form, refusing to flop as they age. Always a reliable performer and a fine plant to welcome spring. - **2 gal \$39**

Magnolia x 'Big Dude' - Big Dude Magnolia - Z5
Looking for a magnolia with massive flowers? Look no further, 'Big Dude' is your man (or woman). Enormous, 12-14" pink and white bi-colored flowers smother the upright, super vigorous plants in early spring. Always reliable and one of the first to flower in our collection each year. - **2 gal \$39**

NEW **Magnolia x 'Black Tulip'** - Black Tulip Magnolia - Z5 - An astonishing selection showcasing 6", burgundy-black blossoms that are among the darkest of any magnolia to date. The robust flowers are well formed developing a resemblance to a tulip as they unfurl prior to leaf emergence. Plants make choice small specimens reaching 25' when mature. - **2 gal \$39; 5 gal \$79 (summer)**

Magnolia x 'Butterflies' PP 7456 - Butterflies Magnolia - Z4
A superior hybrid selected by Phil Savage. Develops abundant, 3-4", dark yellow flowers prior to leaf emergence in spring. Exhibits excellent cold hardiness and will develop into a wonderful 20-30' specimen in time. - **7 gal \$99; Assorted B+B plants individually priced**

Magnolia x 'Coral Lake' - Coral Lake Magnolia - Z5
A David Leach selection that originated as a *M. 'Legend'* x *M. 'Butterflies'* cross. Plants offer luminescent pink flowers brushed with yellow. Individual blossoms are composed of 11 tepals and measure up to 7" wide. - **2 gal \$39; 7 gal \$99;**
Assorted B+B plants individually priced

NEW **Magnolia x 'Coral Reef'** - Coral Reef Magnolia - Z5

A superior magnolia prized for its wealth of coral-salmon blossoms that dress the branches prior to leaf emergence. Flowers flicker in the garden like the finest coral and are certainly sufficient to catch the eye of the winter weary gardener. Plants are quite hardy and durable gaining significant parentage from the sturdy cucumber magnolia (*M. acuminata*). 30' - **2 gal \$39; 5 gal \$79 (summer)**

NEW **Magnolia x 'Daphne'** - Daphne Magnolia - Z6
'Daphne' has been promoted as the darkest yellow magnolia yet to appear on the market. We haven't been lucky enough to see it in flower but couldn't resist the temptation. Named and

introduced by Belgium's top magnolia breeder, Philippe de Spoelberg. - **2 gal \$39; 5 gal \$79 (summer)**

Magnolia x 'Daybreak' - Daybreak Magnolia - Z5
Augie Kehr rated this hybrid the best of his many choice introductions. Displays a brilliant show of 8", fragrant, glowing, rose-pink flowers in early May after the threat of late season frost has past. Plants are exceptionally vigorous and develop a distinct upright growth habit. Will mature 30' in height over many years. - **5 gal \$79; 7 gal \$99; Assorted B+B plants individually priced**

Magnolia x 'Elizabeth' - Elizabeth Magnolia - Z4
A popular and outstanding selection introduced by the Brooklyn Botanic Garden. A profusion of clear, creamy-yellow flowers open in spring prior to leaf emergence. Customers literally stop in their tracks when our 35' specimen is in bloom. One of the best and worth a place in any garden! - **2 gal \$39 (summer); 5 gal \$79; 7 gal \$99; Assorted B+B plants individually priced**

Magnolia x 'Flamingo' - Flamingo Magnolia - Z4
Yet another Phil Savage introduction that waits until just before leaf emergence to display its tulip-shaped blossoms that are described as having a "brilliant, unfading flamingo pink" coloration. Plants develop a formal, pyramidal habit with dense, dark green foliage and have emerged unscathed after temperatures as low as -29°F. - **2 gal \$39; 7 gal \$99**

Magnolia x 'Fran Smith' - Fran Smith Magnolia - Z5
A little known saucer type magnolia that has remained about as hard to find as a chicken with teeth. Fortunately, we've finally managed to propagate enough to offer a few this season. So what's the big deal you may be asking? Well, each leaf is boldly variegated with cream and white splashes providing an eye-catching and irresistible display throughout the growing season. The foliage pattern is relatively stable and holds up much better than other variegated magnolias in sunny exposures. If that's not enough, plants are reported to showcase a wealth of pink-blushed flowers in spring before leaf emergence. This is a truly choice plant that's sure to create quite a buzz. - **2 gal \$45; 3 gal \$69; Assorted B+B plants individually priced**

Magnolia x 'Galaxy' - Galaxy Magnolia - Z5
An extraordinary, upright-pyramidal selection from the U.S. National Arboretum. Striking, 6-10", beet-red flower buds open reddish-purple in late spring after danger of frost. Displays excellent vigor and will mature 20-30' tall. - **5 gal \$79; 7 gal \$99 (summer); Assorted B+B plants individually priced**

Magnolia x 'Golden Gift' - Golden Gift Magnolia - Z5
A compact selection with saturated, clear yellow flowers that are produced from both terminal and axillary buds. Flowering begins after most fear of frost has passed and continues for up to a month. Plants mature 15' tall and typically assume a shrub-like profile. Always in demand and one of our favorites! - **2 gal \$39; 5 gal \$79; 7 gal \$99 (summer); Assorted B+B plants individually priced**

Magnolia x 'Golden Goblet' - Golden Goblet Magnolia - Z5

A David Leach selection that was named and registered in 1997. Offers a showy display of 6", deep yellow, tulip-shaped flowers on a pyramidal plant. - **7 gal \$99; 10 gal \$139 (summer)**

Magnolia x 'Milliken' – Milliken Magnolia – Z5

A unique, compact selection found as a witches' broom by Greg Williams and Sue Milliken near Rhinebeck, New York. Plants are compact and dense with short internodes and a rounded outline. In spring they flower profusely with standard sized, whitish-pink flowers. A real gem likely found nowhere else! - **2 gal \$45**

NEW **Magnolia x 'Porcelain Dove'** – Porcelain Dove Magnolia – Z5 - A fine Gresham hybrid that is the result of a distant cross between *Magnolia globosa* and *M. virginiana*. Plants are valued for their abundant, 4" ivory-white blossoms that appear in June and continue sporadically through summer's end. Each upright flower is well formed and highlighted with prominent, candy pink stamens. All emit a heavenly fragrance that challenges all magnolias for best in class. Plants are semi-evergreen in mild climates and develop an upright growth form – **7 gal \$99**

NEW **Magnolia x 'Savage Splendor'** – Savage Splendor Magnolia – Z5 – An exciting new selection that brings a substantially different color to the world of magnolias. Each 5" blossom emerges a true scarlet-red which takes a dramatic departure from the more common magenta-purple selections. Plants are upright growers developing flowers in the middle of the magnolia bloom season. Selected and introduced by magnolia experts Tim Savage and Dennis Ledvina from a plant raised by the late Phil Savage. - **7 gal \$99**

Magnolia x 'Sunsation' – Sunsation Magnolia – Z5

Another excellent late bloomer with deep golden-yellow petals, each brushed with a purple splash at the base. The sizeable, 7-8" flowers are held upright on the branches and provide a continual display for several weeks in May. Plants are moderate growers developing a formal, cone-shaped habit at maturity. 20-25' - **2 gal \$39; 5 gal \$79 (summer)**

Magnolia x 'Sunspire' – Sunspire Magnolia – Z5

A recent introduction just starting to become better known. Displays rich yellow flowers late in the season on a distinctly fastigate plant. An excellent choice for tight spots or side yards. Plants mature 25' tall and only 6' wide. – **7 gal \$99; Assorted B+B plants individually priced**

Magnolia x 'Ultimate Yellow' - Ultimate Yellow Magnolia - Z4 - A J.C. McDaniel hybrid that was later selected and introduced by Harry Heineman. Plants are distinct, upright growers with 6", deep yellow flowers that are among the darkest to date. Blossoms appear late in the season after all fear of frost has passed and the foliage is approximately half expanded. Reports indicate the plants have performed well in northern gardens, flowering after -30°F. – **2 gal \$39 (summer); 5 gal \$79; 7 gal \$99**

NEW **Magnolia x 'White Rose'** – White Rose Magnolia – Z4

A low-branching, medium-sized shrub discovered as a seedling of Magnolia 'Ballerina'. In early spring the frost

hardy plants provide a generous display of ivory-white blossoms. Each flower is elegant, maintaining good form and reminiscent of roses. - **3 gal \$49; 7 gal \$99**

NEW **Magnolia x 'Wildcat'** – Wildcat Magnolia – Z5

A seedling selection boasting well-shaped, delicate, pale pink to near white flowers. Each 4" flower is comprised of as many as 52 individual tepals and offers a striking resemblance to a pompom chrysanthemum. - **2 gal \$39 (summer); 3 gal \$49; 7 gal \$99 (summer)**

Magnolia x 'Yellowbird' – Yellowbird Magnolia – Z4

A popular upright selection with deep, canary-yellow flowers that are seldom damaged by spring frost. Flowers emerge just as the foliage is expanding. Shows excellent cold hardiness. 30' – **2 gal \$39 (summer); Assorted B+B plants individually priced**

Morus sp. – Mulberry

A genus of approximately 10 species of vigorous trees native to both temperate and tropical regions throughout the world. All have medium green, simple leaves that frequently have unique lobing. Often, multiple leaf shapes are represented on the same plant. Fruit ranges in color from white to deep purple and are of high value to wildlife. Branches are also used to weave baskets.

NEW **alba 'Paper Dolls'** – Z4 - An intriguing selection of white mulberry (*Morus alba*) boasting glove-shaped leaves that are heavily mottled and splashed with creamy-white. Plants are vigorous growers forming irregular 15' shrubby trees in time. Great for both color and alluring foliage texture! - **2 gal \$39 (summer)**

NEW **bombicis 'Unryu'** – Z5 - A whimsical-looking, contorted mulberry sure to impress visitors with its odd, twisted, zig-zag branch pattern. Large, heavily lobed leaves provide added appeal during later winter. Best when sited in a location where the winter branch silhouette can be showcased. This selection of *Morus bombicis* will form a sizeable specimen if left to its own. We prefer to give it an annual buzz cut each spring and maintain it as a 6-8' shrub. - **3 gal \$45; 7 gal \$89 (summer)**

Nyssa sylvatica – Black Tupelo – Z4

A magnificent, slow growing, medium-sized, deciduous native tree. The oval foliage is lustrous dark green in summer and transforms to vivid shades of orange, scarlet and yellow in autumn. Female plants frequently produce copious crops of blue fruit that are cherished by birds and other wildlife. In winter, the dark, blocky bark and unique branching pattern provide added interest. 30-50' - **Assorted B+B plants individually priced**

'Big Momma' – A unique cultivar offering huge waxy-green leaves and larger fruit. Both the foliage and fruit are nearly twice the size of typical seedlings. Plants develop brilliant scarlet fall color. - **3 gal \$49; 7 gal \$99**

'Hayman's Red' Red Rage™ – Red Rage™ lives up to its name offering up glossy, deep green foliage that consistently develops shimmering shades of red, scarlet and burgundy in autumn. The vigorous plants quickly take on a pyramidal canopy and are among the best options for use as urban specimens. Truly a superior selection of one of our finest native trees. - **7 gal \$99**

'Sheri's Cloud' – Can you say amazing! That's what we said when we first saw this spectacular clone of black gum! Imagine if you will light green leaves edged with a bold, creamy-white margin! Add to that dazzling scarlet and hot pink, bi-colored fall color and you've successfully envisioned 'Sheri's Cloud'. A brilliant find from the wilds of Arkansas and a welcome addition to the ever expanding selection of cultivars.

- 2 gal \$45; 5 gal \$89 (summer); 7 gal \$109 (summer)

'Wildfire' – A dazzling new selection offering startling burgundy-red new growth that is present as long as new growth is being produced. Plants exhibit exceptional vigor and bright scarlet-red fall color. – 3 gal \$49 (summer); 7 gal \$99

NEW **'Yiping' Jolly® PPAF** – A unique new variegated wow plant sure to turn heads with its impressive white marbled foliage. Unlike many variegated plants, the dazzling leaf color actually becomes more pronounced as the season progresses. In autumn the show continues with a tricolored display of scarlet, hot pink and fiery orange tones. Certainly an electrifying new plant that will be sure to command season long attention. - 3 gal \$59 (summer)

'Zydeco Twist' – A distinct and downright cool black gum showcasing stems that twist and spin in all directions. They're quite akin to Harry Lauder's walking stick and are certainly not what most have come to expect from this fantastic species! Regardless, this is a striking plant for those looking for a fun addition to their gardens. - 3 gal \$49; 7 gal \$99 (summer)

Oxydendrum arboreum – Sourwood – Z5

An eye-catching small flowering tree, native to the southeastern United States. In mid-summer plants develop elegant, drooping racemes of white, urn-shaped flowers. The overall display can be breathtaking and often remains effective for several weeks. In fall, the glossy, dark green foliage transforms to fiery shades of crimson and scarlet. Plants thrive under conditions suitable for other ericaceous plants. – 2 gal \$35; 5 gal \$69 (summer); Assorted B+B plants individually priced

Parrotia persica – Persian Parrotia – Z5

Persian parrotia is a remarkable, underutilized member of the witch hazel family native to regions of northern Iran. Plants develop into low-branched, moderate-sized specimens with a patchwork of exfoliating gray, green and white bark at maturity. In late winter, flowers composed of rich, crimson-red stamens and maroon bracts create a curious effect along the barren stems. Foliage unfolds blushed with red-purple and changes to unblemished, dark green with age. Shimmering yellow, orange and crimson fall color prevails on the finest specimens. 20-40'

'Pendula' (Kew Form) - A graceful weeping parrotia that develops into a great specimen plant in time with excellent, red-orange-purple fall color and handsome mottled bark. Our plants are descendents of the magnificent weeping specimen that resides at Kew Gardens in England. - 2 gal \$45; 3 gal \$69; 5 gal \$99 (summer)

'Vanessa' – A distinct, upright form with the same gorgeous fall color of the species. Attractive and valuable for restricted spaces where an upright specimen is required. - 2 gal \$39 (summer); Assorted B+B plants individually priced

Poliiothyr sis sinensis – Poliiothyr sis – Z6

A rarely encountered, moderate sized, deciduous tree native to central China. The large, cordate to ovate leaves emerge in spring flushed with burgundy overtones and age to rich, glossy green by early summer. By August plants are cloaked with a wonderful display of finely textured, creamy-white, terminal flower panicles. Cultural requirements are a bit unclear; however the few plants we have witnessed were growing happily in well-drained soils in either full sun or partial shade. Makes a unique novelty plant and is sure to stump your plant crazed friends! - Assorted B+B plants individually priced

NEW **Prunus americana** – American Plum – Z3

An irregularly branched large shrub or small tree native to much of the northeastern United States and Canada. Plants sport a profusion of brilliant clear-white flowers in spring that are present prior to leaf emergence. Flowers mature into 1" red plums by early autumn which are cherished by some wildlife and can also be used to make jams and jellies. The densely branched plants provide a valuable nesting habitat for many bird species. Plants are easy to grow performing best in sun to part shade in average garden soils. - Assorted B+B plants individually priced

Quercus robur 'Concordia' – Golden English Oak – Z5

A unique cultivar of a stately specimen tree with unblemished, soft yellow foliage throughout spring and summer. Plants are slower growing than the species and are best sited in areas with even moisture. – 2 gal \$39 (summer); 5 gal \$79

Robinia pseudoacacia – Black Locust – Z4

A moderate-sized tree native to regions in the midwestern and southeastern United States. The narrowly-upright plants offer blue-green compound leaves that set off pendulous clusters of creamy-white, highly fragrant flower clusters in June. Winter's bare branches weave and twist in a picturesque fashion adding their own charm to the dormant garden. 30-40'

'Frisia' – A beautiful and underutilized form with striking, golden-yellow foliage that spices up the spring and summer garden. The coloration is best on vigorous shoots and maintains its intensity quite well throughout the growing season. An excellent plant for use in the back of the shrub border where it should be cut back hard each spring to promote an abundance of vigorous, outrageously colored growth. - 3 gal \$45; 7 gal \$99 (summer)

Stewartia monadelph a – Tall Stewartia – Z6

A dramatic, upright pyramidal stewartia that will develop into a large, multi-stemmed shrub or small tree. The ovate, lustrous dark green foliage transforms to brilliant, deep scarlet-red shades in autumn. Five-petaled white flowers with yellow stamens open in June and July and provide a perfect compliment to the foliage. Rich, cinnamon-brown bark adds notable winter interest. In our climate, plants perform best in a protected location in partial shade. 20-25' – 3 gal \$49; Assorted B+B plants individually priced

Stewartia pseudocamellia – Japanese Stewartia – Z5

One of the finest and most desirable small specimen trees available. Offers numerous, white, camellia-like blossoms backed by lustrous dark green foliage in summer. Fall brings on a startling display of fiery orange to reddish-purple leaf

coloration. In winter, the plant stands alone with its remarkable smooth exfoliating bark that forms an elegant patchwork of gray, orange and brown against the winter landscape. A well-grown Japanese stewartia truly has few rivals and should find a home in every garden. 20-30' – **2 gal \$35; 5 gal \$79; 7 gal \$109; 7-8' B+B \$299; 8-9' B+B \$329; 9-10' B+B \$389; 10-12' B+B \$449**

'Ballet' – An exceptionally vigorous selection from the Polly Hill Arboretum. Offers larger flowers and brilliant exfoliating bark. Always in high demand and rarely available. – **2 gal \$45; 5 gal \$99; 7 gal \$139 (summer)**

'Korean Splendor' – A vigorous selection of *S. pseudocamellia* var. *koreana* with delightful, oversized saucer shaped flowers that stay on the branches somewhat longer than typical seedlings. In autumn plants offer reliable bright yellow to reddish-orange fall color. Has been a top performer in our gardens offering the best features of this fine species. – **2 gal \$45**

'Milk and Honey' – 'Milk and Honey' was selected by Polly Hill from a group of plants grown from seed collected at the Arnold Arboretum. In July plants develop an abundance of oversized, milky-white flowers that open flat to display their slightly ruffled petals and honey-gold stamens. Choice and very difficult to propagate so plants are rarely available! – **2 gal \$45; 5 gal \$99 (summer)**

Stewartia rostrata - Beaked Stewartia – Z6

Beaked stewartia is a little known, Chinese species that frequently develops into a large stature, upright shrub or small tree. In spring, the emerging flower buds are surrounded by showy, reddish-maroon floral bracts. The handsome flowers appear slightly earlier than other species of stewartia and often measure up to 2.5" in diameter. In our climate, plants perform best in a protected location in partial shade. – **5 gal \$79; 7 gal \$109 (summer); Assorted B+B plants individually priced**

Stewartia x henryae – Hybrid Stewartia – Z5

A group of hybrid plants resulting from open pollinated crosses between *Stewartia pseudocamellia* and *S. monadelphica*. Each plant is unique however all offer characteristics that are intermediate between the two parents. As a general rule, most will display flowers that more closely resemble *S. monadelphica* and bark that resembles *S. pseudocamellia*. All are spectacular and garden worthy! – **9-10' B+B \$269; 10-12' B+B \$299; 12-14' B+B \$349**

Stewartia x 'Scarlet Sentinel' – Scarlet Sentinel Stewartia – Z5

An exceptional recent selection introduced by Peter Del Tredici of the Arnold Arboretum. Reported to be a hybrid between *Stewartia pseudocamellia* and *S. ovata* var. *grandiflora*. The overall appearance is similar to typical *S. pseudocamellia* however the large white flowers are punctuated with striking rose-pink stamens rather than the more typical yellow stamens. Plants are very difficult to propagate yet are among the finest of the growing list of stewartia cultivars! We are excited to be one of the only sources in the world for this choice selection. – **2 gal \$45 (summer)**

Styrax americanus – American Snowbell – Z5

A large, rounded shrub native to rich lowlands in the southeastern United States. Develops a spectacular display of

white, bell-shaped nodding flowers that hang from the branches in May and June. The pest free foliage is bright green and remains attractive throughout the growing season. Makes an attractive, low maintenance shrub for any garden. Our plants are cutting propagated from plants that have performed reliably in northern New York. – **3 gal \$45; 5 gal \$89 (summer); Assorted B+B plants individually priced**

Styrax japonicus – Japanese Snowbell – Z5

The Japanese snowbell is likely the most frequently planted species of this remarkable genus. Plants form delightful, horizontally branched small trees. Slightly fragrant, 1" bell-shaped flowers dangle from the branches in late May and early June. The sight is one to be cherished and especially nice when viewed from beneath. Makes a great plant for use along patios or decks or other places where the horizontal branch structure can be used to break up strong vertical lines. 20-30' – **Assorted B+B plants individually priced**

'Fargesii' – A vigorous, upright form that offers lustrous, dark green foliage and a prolific display of bell-shaped flowers. Easy to cultivate and hardier than other selections. – **2 gal \$35; 5 gal \$79**

'Fragrant Fountain' PPAF – A new weeping form of *Styrax japonicus* that tends to develop an upright central leader with limited staking. All secondary branches weep strongly. Plants show excellent vigor and develop the same magical star-shaped, fragrant white flowers as the species. – **3 gal \$69**

NEW 'Frosted Emerald' – An irresistible new styrax which promises to become one of the more coveted plants we grow! The slow growing plants showcase exquisite white-edged leaves that are so heavily variegated we question how they can muster the strength to survive. Certainly not a plant that's going to blend into the garden yet one that all collectors will lust after. – **3 gal \$89**

'Pink Chimes' – A delightful, small-stature form offering unique, soft pink blossoms and dark glossy green foliage. Appears to be somewhat slower growing and a bit less cold hardy than other selections. – **2 gal \$39 (summer); 3 gal \$49; 5 gal \$89**

Styrax obassia – Fragrant Snowbell – Z5

A favorite small specimen tree native to Japan, Korea and China. In May and June plants are cloaked with 6-8" racemes of fragrant, white flowers backed by large, rounded leaves. As an added bonus, plants are reported to be slightly more cold hardy and heat tolerant than *S. japonicus*. 20' – **2 gal \$35; 5 gal \$79 (summer); Assorted B+B plants individually priced**

Syringa reticulata – Japanese Tree Lilac – Z3

An appealing small specimen tree suitable for use in a wide range of sites. Over time plants develop into versatile specimens some 15-20' in height. In May and June the oval-rounded canopy is covered with masses of frothy, creamy-yellow flower panicles. Attractive, cherry-like, brown bark provides added seasonal interest.

'Golden Eclipse' – A new Japanese tree lilac with showy, yellow-edged foliage throughout the growing season. Makes an exciting combination with the large panicles of creamy-white flowers that appear in early summer. – **2 gal \$39 (summer); 5 gal \$69**

'Ivory Silk' – A handsome, medium-sized tree developing large panicles of sweetly fragrant, whitish-yellow flowers in June. The shiny, maroon-red bark resembles the bark of a cherry and can be quite striking in the winter months. 20-25' – **7 gal \$89; Assorted B+B plants individually priced**

Tilia cordata – Littleleaf Linden – Z4

A deciduous medium sized tree native to regions in Europe. Plants have long been in cultivation and are most valued for their formal pyramidal to conical habit and adaptability to difficult growing conditions. The heart-shaped leaves are deep green, free from disease and transition to shades of yellow and gold in autumn. Specimens are pollution tolerant, pH adaptable and easily cultivated in sunny locations in well-drained soils.

'Akira Gold' – A fantastic gold-leaf selection offering beautiful chartreuse foliage throughout the spring and summer months. Plants are good growers but require full sun to develop the best leaf coloration. Introduced by Akira Shibamachi, one of Japan's leading plantsmen. - **2 gal \$45**

'NCSU Dwarf Weeper' – A dense, rounded form of littleleaf linden forming a compact shrub reaching 6-8' tall in time. The dark green foliage is attractive throughout the season and turns bright yellow in autumn. - **2 gal \$39; 3 gal \$59 (summer)**

Ulmus glabra – Scotch Elm – Z4

A massive, upright arching tree frequently reaching 80-100' tall. Branches are cloaked with glossy, dark green leaves that have a classic elm shape. The species is rarely cultivated however several impressive cultivars are worthy garden additions.

NEW **'Aurea'** – A little known selection valued for its vivid golden foliage that makes a strong garden presence all season long. The vigorous plants thrive in tough spots and work well as tree-sized specimens or pollarded shrubs. - **3 gal \$49**

'Camperdownii' – The classic Camperdown elm discovered in the early 19th century as a curious seedling found sprawling along the ground in Dundee, Scotland. Under cultivation plants develop a unique sculpted form of horizontal branches and weeping branch tips. Quickly makes a fantastic specimen that is sure to grab attention. 25' - **5 gal \$79; 7 gal \$99; Assorted B+B plants individually priced**

Ulmus parvifolia – Lacebark Elm – Z5

A durable species of elm used frequently in the landscape industry. The lustrous dark green leaves turn pleasant shades of yellow and reddish-purple in fall and provide an excellent compliment to the gray, green, orange and brown mottled bark. Plants are vigorous, develop a symmetrical canopy, are adaptable to numerous sites and are easy to cultivate.

'Golden Rey' PP 7240 – An undemanding tree offering graceful, butter-yellow foliage that remains colorful and free from scorch deep into the growing season. Plants possess the typical grace, vigor and adaptability of the species. - **5 gal \$69; 7 gal \$99 (summer)**

'Hokkaido' – A curious dwarf form with miniature toothed leaves and dense branching. Plants are ideal for rock gardens or a location where you won't step on them! – **2 gal \$45**

Ulmus x hollandica 'Wredei' – Golden Elm – Z5

A unique, disease resistant elm that has sparked a lot of interest at the nursery. Plants showcase a wild display of golden-yellow, crinkled leaves held in crowded clusters along the branches. Over time plants develop into unique, upright specimens. - **3 gal \$49; 5 gal \$99 (summer)**

Xanthoceras sorbifolium – Yellowhorn – Z5

A seldom encountered, small stature tree that is unjustly rare in cultivation. In May, plants showcase 8-10" arching clusters of 1" fragrant flowers. Each five petaled flower is clear-white with a distinct blotch at the base that ages from yellow to red. After flowering, the handsome, green, compound leaves provide a pleasing texture and fresh appearance to the landscape. Surely one of the best small flowering trees. 12-15' – **2 gal \$39**

Zelkova serrata – Japanese Zelkova – Z5

A popular shade tree valued for its adaptability and vase-shaped habit that is reminiscent of the American elm, *Ulmus americana*. Dark green foliage and attractive gray and brown exfoliating bark provide added appeal. Plants are resistant to Dutch elm disease as well as the elm leaf beetle. 80'

'Bright Park' – A shocking new zelkova with jaw dropping, golden-orange foliage and orange-brown winter stems. The few plants we've evaluated to date have been brilliant all season. 30' - **2 gal \$39 (summer); 7 gal \$89; Assorted B+B plants individually priced**

'Goblin' – A slow growing, bushy zelkova reaching only 4' high and wide at maturity. Rarely offered for sale in the United States but certainly one of the coolest dwarf plants for that tight garden space! - **2 gal \$45; 3 gal \$69**

'Goshiki' – An exciting cultivar of this elegant, vase-shaped tree. Leaves are boldly splashed and streaked with white. Plants are somewhat slower growing than the species and prefer part shade. A fine grown specimen is certainly among the most brilliant of all variegated plants. 15-20' – **2 gal \$39; 3 gal \$49; 7 gal \$89; 10 gal \$129 (summer); Assorted B+B plants individually priced**
